Antibacterial polymers and method for obtaining the same

Abstract

The invention relates to polymers selected from among polypropylene (PP), polycarbonate (PC), acrylonitrile-butadiene-styrene (ABS), polyvinylchloride (PVC) and polyethylene terephthalate (PET), polyion and polyanione, having antibacterial properties, wherein the antibacterial effect is obtained by using a silver salt selected from among: zinc PCA, zinc citrate, zinc hydroxide, zinc pyrrolidone or zinc pyrithione and during the process of polymerization of the monomers. The antibacterial polymers are used to prepare products intended to enter into contact with the skin.
